

Subject: more surveys

Hi Brian and Beth,

Can you please share with the Task Force and post on the public site? This does help shape the Task Force Recommendations and Rankings.

There was an additional survey done on Downtown Winchester businesses this summer. Most questions addressed business esp. related to COVID. There were 2 questions to business owners directly focused on parking. Unlike the prior survey that was from Downtown shoppers/clients, this survey was directly to business owners for their view on parking. Very clearly businesses have heard parking concerns with 77%+ of customers unable to find a space near the desired store. Also, it is clear business owners do not think customers would pay for parking with 63%+ saying No.

The 2 questions were,

-if you own a store front in Winchester, have your customers complained to you about the ability to find a parking space to shop in your store?

Responses

Yes 77.3%

No 13.6%

Others 9.1%

-In your opinion, do you think your customers would be willing to pay to park in the Town Center?

Yes 8.2%

No 63.6%

Other 18.2%
